Lighting

EXTERIOR COLLECTION

Welcome to one of the most comprehensive and design driven collections of lighting for outdoors.

With over 400 different designs and 100 styles to choose from across a broad selection of sizes, there is an option for all applications, including lifestyle models for outdoor living spaces. All of these products offer detail in design and quality in manufacture, with many models featuring materials and finishes that allow us to give enhanced product warranties. This includes products for the severest ocean facing locations with materials that can withstand the harshest of conditions.

OUTDOOR LIVING

Our series of dedicated products for outdoor living spaces, is aimed to enhance and bring the indoors outside. More and more people, whether at home or in a hotel, bar or restaurant, enjoy being outdoors to eat, relax and spend social time together. Our Outdoor Living models offer new lighting options such as Outdoor Chandeliers to bring new life to these locations.

COASTAL

Planet earth is covered by more than 70% ocean, and has more than 620,000 miles of coastline. With a 3.5% content of salt in seawater, and with coastlines often accompanied by extreme temperatures, sun and high winds, it is no surprise that coastal damage due to saline conditions is one of the major outdoor lighting challenges in such locations. This Coastal range delivers solutions that use materials with this very much in mind. Robust, rust resistant and UV stable to resist the harshest of climates, these fittings combine technical competence with design, style and variety.

LED LAMPS

The majority of our outdoor fittings use E27 or E14 lamp-holders, which makes them suitable to use retrofit LED lamps. Our range offers an LED lamp solution for every such fitting in this catalogue. Using the latest LED filament technology, these energy efficient lamps offer good lumen output, look stylish with their retro vintage influences, yet run at a cool temperature and have a 25,000 hour life expectancy.

MODERN & FUNCTIONAL

The interpretation of Modern lighting can vary. Designs can be based on anything from updated Scandinavian retro looks, to more clean and straight lined styles inspired by modern architecture. Some models incorporate integral LED for low energy consumption and all suit both residential and commercial applications. See our new ranges of functional bollards and sign lights.

stainless steel cover

52825

TRANSITIONAL

Transitional describes designs that derive from classic styles but have been conceived with a contemporary edge. Transitional lanterns are less ornate than their classic counterparts, but aren't as streamlined or minimalist as modern styles. They combine the best of both worlds for a clean, comfortable look wherever they are placed.

TRADITIONAL

The lanterns in this collection are for more traditional period properties that require designs with detail and character. Look out for the large scale models as well as the more petite traditional lanterns, scaled for the perfect country cottage or hospitality settings.

OUTDOOR LIVING

It has become a popular trend to extend home living areas into gardens, patios and verandas. Elstead have a number of more decorative IP44-based solutions that help to bring the inside outdoors. Either by using chandeliers or nesting multiple pendants over tables or seating areas, great style can be brought to these outdoor leisure areas.

EXTERIOR FANS

Our exterior ceiling fans bring style and airflow to your favourite al fresco entertaining spaces. Each fan offers premium finishes and hardware designed to withstand the elements for years of worry-free performance.

60678

Page 318

60676

Page 313

Model Shown: 60676

Model Shown: 60680

This exterior fan collection turns ceiling fans into outdoor focal points. There are many unique modern and traditional styles and some very interesting finishes, blending technology and superior air performance with aesthetic style and design.

SYMBOL GUIDE

This ceiling fan uses an AC (alternating current) motor.

This ceiling fan uses a DC (direct current) motor, meaning it uses less electricity.

This ceiling fan has an IP rating of 23, meaning it is protected against limited exposure to water spray.

This ceiling fan has an IP rating of 44, meaning it is protected against splashing water from any angle.

This ceiling fan comes fitted with an LED light source with low energy consumption.

This is the bladespan of the ceiling fan - its widest diameter. We provide the measurement in both centimetres and inches for ease of use.

This ceiling fan can withstand fair outdoor conditions and should be used in sheltered areas.

This ceiling fan can withstand wet outdoor conditions.

DOWNROD EXTENSIONS

All semi-flush ceiling fans come complete with one short downrod between 4 - 7" long (102 - 176mm). You can check the downrod section on each product page to find out what the length is for your chosen fan. This rod can be replaced with our downrod extension accessories, and custom lengths can be supplied by special order.

DESCRIPTION

This 52 inch Patio fan is finished in Olde Bronze with reversible blades in either Medium or Dark Walnut. It is IP23 rated for covered outdoor living areas.

INCLUDED FEATURES

- Downrods** 1 x 114mm
- Mounting Options** Standard, Angled
- Light Type** 3 x 8W LED E27, Bulbs Not Included
- Light Glass** Clear Seeded

FAN FEATURES

- Mounting Slope/Pitch** 30°
- Location Rating** IP23 (Damp)
- Hanging Weight** 10.67kg
- Body Material** Steel
- Warranty** Limited Lifetime

Finish: Matte White

DESCRIPTION

This 42 inch ceiling fan is IP44 rated and is an ideal choice for larger outdoor porches and patios. Detailing on the motor housing increases the stylish appeal. It is made of a composite material that is corrosion-resistant to withstand harsh outdoor elements such as extreme heat, saltwater spray, intense cold and constant UV exposure.

1. FINISH CONSISTENCY: Some fittings have what seem to be the same finish code, but these finishes can vary between ranges, as they come from a number of different manufacturers whose techniques and processes are not always the same. Please note when specifying.

2. WATTAGES: Most fittings shown in the catalogue are shown with Maximum Wattage recommendations. These recommendations are calculated mainly by heat capability, as there is a correlation between heat and wattage. However, in many countries, traditional incandescent lamps, such as 100W GLS are no longer available. There are now many new LED versions of lamps in the market, with much lower wattage but similar light performance, classed as Lumens. Most fitting's wattage capacity and certification have been based on the criteria using an Incandescent lamp and so when choosing lamps, please take care to ensure that the wattages specified are of no more than the equivalent original incandescent lamps.

3. IP RATINGS: All exterior fittings have an IP (Ingress Protection) rating which is a declaration of how much protection any product has against the ingress of both water and dust/particles. The minimum rating for an outdoor luminaire exposed to rain should be IP23 and the maximum can be up to IP68 (this can vary in different countries) which means the fitting is submersible. Most of our fittings are IP44 or greater and some of the Landscape models are up to IP67 meaning they can be covered by water up to a depth of 150mm, such as in-ground lights. See the IP Ratings table for full classifications. Typically, the higher the numbers, the higher the performance.

4. INSTALLATION CARE & MAINTENANCE:

When installing all outdoor lights, it is recommended to lightly grease all threaded parts and screws / nuts to ensure that fittings can easily be disassembled for cleaning or lamp replacement. When handling certain fittings / finishes such as polished copper they can easily finger mark, so it is recommended that bare hands on these surfaces is kept to a minimum. Please retain receipt and installation instructions for future reference. Scratches to paintwork, on glass and other areas are not the responsibility of the manufacturer.

5. FINISH MAINTENANCE: All fittings being installed outdoors and exposed to the elements of weather and atmosphere should be maintained. Most of this relates to rinsing and cleaning with warm water, so that excessive build-up of airborne material and saline content is reduced. Many of our fittings are supplied in a natural finish, i.e., Polished Copper un-lacquered and Teak wood. These fittings can naturally age over time or to maintain their original appearance, treatment is needed, such as oil for teak, beeswax for brass and light oil for Copper and Stainless Steel.

When handling finishes during maintenance, small marks may show which can be easily polished away if required. The alternative is to allow the material to age and weather naturally, which does no harm to the fitting. All lacquered fittings, such as the products on p219-221, will age early on as the lacquer ages and the fittings will spot and pit until after some time, they will have a more natural patina. Regular washing and waxing are the best way to keep close to the original finish on such products.

Additionally, when installing cast aluminium fittings, a light coating of beeswax or oil can give the finish extended life, especially when in coastal areas. For all models, we highly recommend that exterior fittings are cleaned once per year with fresh water and oiled or waxed to give longer service. Lenses and glasses also benefit from cleaning but take care of sharp edges on glass and with polycarbonate or acrylic as these materials can easily scratch if any abrasive cloth is used.

6. CUSTOMISATION: Some of our ranges supplied in matt black can be relatively easily patinated into finishes such as Black/Gold, Black/Copper etc. Equally, for chain-suspended fittings that need extra chain and cable, these can also be relatively easily undertaken. Both such modifications may incur longer lead times and will have small additional costs added to the price. (See current Terms and Conditions.). Beyond this, with appropriate lead time and client budget, more specialised changes can be undertaken such as different colours completely, changes to dimensions and design modifications and even fully bespoke fittings can be considered due to our varied manufacturing resources available.

IP RATINGS

1st Digit	Short Description (Protection against ingress of solid bodies)	2nd Digit	Short Description (Protection against ingress of moisture)
0	Non-Protected	0	Non-protected
1	Protected against solid objects greater than 50mm dia.	1	Protected against dripping water falling vertically greater than 50mm diameter
2	Protected against solid objects greater than 12mm dia.	2	Protected against dripping water when the Luminaire is tilted up to 15° from its normal position
3	Protected against solid objects greater than 2.5mm dia.	3	Protected against spraying water falling on the Luminaire at any angle up to 60° from the vertical
4	Protected against solid objects greater than 1mm dia.	4	Protected against splashing water from any angle
5	Dust-protected	5	Protected against water jets from any direction
6	Dust-tight	6	Protected against powerful water jets
		7	Protected against immersion in water under defined conditions
		8	Protected against continuous submersion under manufacturers specified conditions
Example IP65 Dust-tight and protected against water jets from any direction.			

Safety is paramount with all lighting, and especially when used outdoors. All products within this catalogue conform with the UK and European Union Low Voltage Directive, **(BS) EN 60598-1:2008**, the product standard for luminaires recognised across Europe and all fittings are **CE** marked. They are also **IP** rated to ensure suitable protection against the ingress of water.

Every luminaire is individually tested to ensure that the product is electrically sound and meets the company's quality standards. A unique test/batch number is then applied to the fitting. Please contact us for further details or advise us of your local needs.

We also are **ISO 9001:2015** certified in both of our 2 key production and logistics locations.

GENERAL 2-YEAR GUARANTEE: All fittings supplied by us, both interior and exterior, have a manufacturer's minimum guarantee of 2 years. This means that in normal and fair service, (and without incorrect or inappropriate installation or location), any product sold by us, or by our partners / resellers, should have no fault develop within a minimum of 2 years from purchase. Any fault that is found is covered by guarantee to be repaired or replaced at the supplier's cost, within this period. ALL Lighting warranties/guarantees do not cover out-of-pocket expenses or consequential costs. The definition of fault excludes the surface finish of brass and copper materials that age / patina early after being exposed to the atmosphere.

3, 5, AND 10-YEAR ANTI-CORROSION GUARANTEES: Many outdoor fittings have anti-corrosion guarantees stated on each relevant page. This guarantee relates to the corrosion of paintwork on cast aluminium or steel fittings and excludes locations within 5 miles (8km) of the coastline.

COASTAL COLLECTION - TYPE 2 - FIVE YEAR GUARANTEE: These fittings are designed to be placed in the toughest of conditions including right by the coastline without exclusion. This guarantee covers the protection of the finish on all composite parts against corrosion or significant UV degradation (normal aging / fading allowing). Internal and ancillary metal parts are excluded from this guarantee.

COASTAL COLLECTION - TYPE 2 - FIFTEEN YEAR WARRANTY AGAINST STRUCTURAL FAILURE: Those models listed as having a 15-year warranty are guaranteed, that from purchase to within 15 years of normal use, the fittings will not deteriorate to any extent where they experience any structural failure. There may be signs of ageing, corrosion or paint peeling and fading, but the integrity of the construction of these fittings means they will not deteriorate to any extent where they are rendered unusable within a lifetime of 15 years.

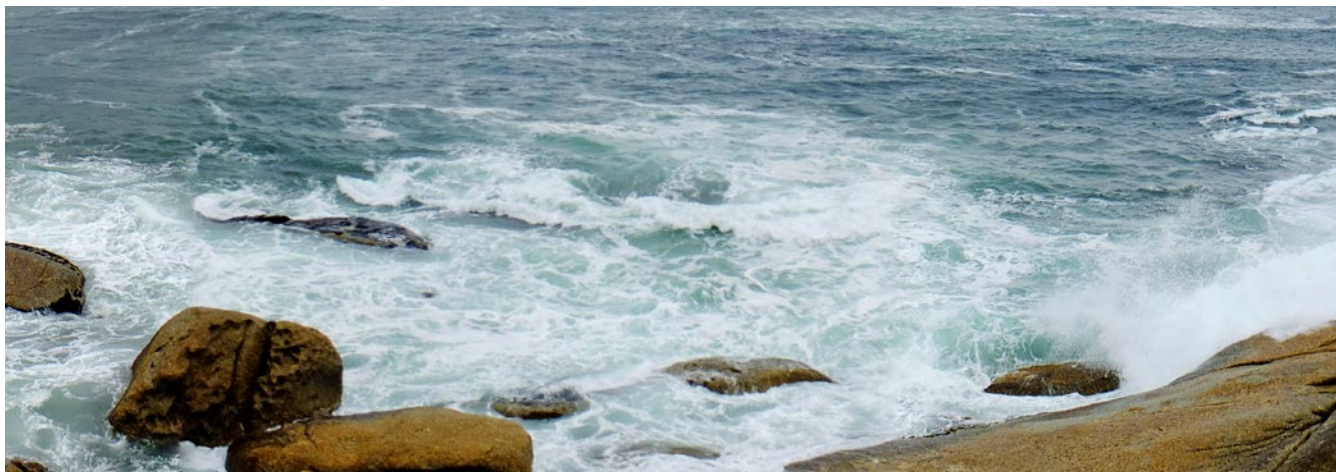

COASTAL COLLECTION - TYPE 2 - TWENTY YEAR GUARANTEE: These fittings are designed to be placed in the toughest of conditions including right by the coastline without exclusion. This guarantee covers the protection of the finish against corrosion or significant UV degradation (normal aging / fading allowing).

LIMITED LIFETIME WARRANTY: This warranty relates to certain ranges/models shown in this catalogue which are produced of materials that have an exceptionally long-life expectation, such as solid copper and brass lanterns. These fittings will age over time (subject to location and maintenance given) but will not deteriorate to an extent where they will no longer function for the purpose intended. The "Limited" element relates to component parts such as rubber seals, lamp-holders etc. which are repairable but are not covered by the Lifetime warranty.

GUARANTEES DISCLAIMER: In the instance that fittings have been damaged, repainted, or cleaned with an aggressive cleaner, they may be excluded from the entitlement to a replacement. Prior to agreeing to replace any fittings, the company reserves the right for the original seller or a representative of the company to inspect the damaged parts and / or for photographic evidence to be supplied. ALL Lighting warranties/guarantees do not cover out-of-pocket expenses or consequential costs. The definition of fault excludes the surface finish of brass and copper materials that age / patina early after being exposed to the atmosphere.

LED MODULE AND PIR SENSOR GUARANTEES: Within this catalogue, there are a number of products incorporating PIR sensors or LED modules. Whilst the fittings themselves may have varying physical guarantees against their life expectancy, these electronic parts are separately covered by a 2-year guarantee against failure. After this period, they are still repairable and serviceable, either by the company or local supplier.

LIMITED LIFETIME WARRANTY ON CEILING FANS

1. The warranties mentioned cover all light fixtures in our Coastal Collection Type 1.
2. The Producer does not bear any further liability and is not responsible for consequential loss, additional costs as a result of damages, additional costs for any mounting and dismounting of the lighting, delivery of the lighting to the Producer, sending back product not qualified to be covered by warranty, and responsibility of damages caused by unprofessional installation of the outdoor lighting.
3. Liability of the Producer is limited to the value of the product.
4. The warranty covers the following:
 - anti-corrosion protection of light fixture elements – the warranty periods, which are determined by design version, are listed in the table below:

Product types	Warranty period
Wood parts on products	2 years
Products / parts with outsourced casting or finishing processes	3 years
Die-cast aluminium, Extruded aluminium, Painted steel	5 years
Galvanised steel products	8 years
Copper elements, 316L Marine Grade stainless steel	10 years

N.B. electrical components have 5 years warranty. PIR sensors have 2 years warranty.

5. WARRANTY EXCLUSIONS:

The warranty does not cover the following:

- Products damaged in transport.
- Improperly used products.
- Products installed inconsistently with the attached instruction manual.
- Products powered by electrical voltage different from that specified in the instruction manual.
- Products used with light bulbs with power exceeding that specified in the instruction manual.
- Damaged products due to power surges or discharges in the electrical network.
- Products damaged by forces of nature and natural disasters.
- Products installed in floodlands.
- Products used without protection from faeces of household animals (cats, dogs, etc.).
- Products mechanically damaged by the user when the integrity of the protective layer is broken (scratches, bends, dents, cracks, etc.).
- Products damaged by aggressive chemical agents.
- Products with cracks, local stains, resin leaks, or reduced UV resistance of polycarbonate lamp shades resulting from natural aging of the materials used in production (Scandinavian wood, PC lampshades).

6. GENERAL TERMS OF USE:

- We strongly recommend that the products are installed by a qualified electrician.
- Freestanding light fixtures should be installed to the ground with appropriate anchors.
- Do not wash the fixtures with strong (abrasive) cleaning agents or chemically aggressive liquids (specifically solvents).
- Do not clean with a pressure washer or high powered washer jet.
- Condensation is a natural phenomenon that occurs in certain atmospheric conditions. Moist warm air and cold meet and cause condensation of water inside the lamp/glass.
- All products are manufactured using high quality materials and designed for many years of service, providing the unit is cared for regularly as defined below under "Care Instruction".
