Lighting

INTERIOR COLLECTION

Welcome to Distinctive Lighting, bringing you one of the most comprehensive ranges of design-driven decorative lighting and ceiling fans.

Whether you are lighting your lounge or hall, kitchen or bathroom, bedroom or stairwell, we have a huge and wide variety of options to choose from. We focus on unique styles with great attention to detail, along with options of larger and more dramatic scales. These stylish light fittings get used in beautiful homes, bars, restaurants, care homes and hotels around the world and we hope you will be equally inspired to use these products in your home or commercial projects.

CONTEMPORARY & TRANSITIONAL

This Contemporary collection brings modern elements to more classic/mid century shapes and styling cues. They all have a unique design and showcase high-quality craftsmanship which is deserving of the sleekest designer settings. Our more Transitional models bridge the gap between Contemporary and Traditional. They are still loyal to classic design but have a fresher interpretation. Easy to place and versatile, these Transitional ranges are suitable for both residential and hospitality settings.

COUNTRY & TRADITIONAL

Based on original styles with historical influences, this Traditional lighting collection offers a large expanse of choices in size, style and colours. Many of the products have hand-painted finishes representing old bronzes, aged silvers and gilded golds that were commonplace in years gone by. You will find some families that suit period and country settings including grandiose hand forged iron fittings and solid wood models in aged finishes. All the styles in this section are suitable for both residential and hospitality situations.

TIFFANY

STYLE LAMPS

LOUIS COMFORT TIFFANY

The use of stained glass has been around and admired for more than a 1000 years, where it was most commonly used on cathedrals and churches. However, one of the most famous designers in this field was Louis Comfort Tiffany who also developed lighting products featuring stained and art glass at his famous New York studios.

Tiffany himself had originally trained as an artist and later learnt the craft of glassmaking while working at several glasshouses in the Brooklyn area. After perfecting some of his own techniques for stained glass by making his own opalescent glass utilising the copper foil technique, he founded Tiffany Studios in 1879. At its peak, the then famous and highly successful company employed more than 300 artisans. Tiffany original objects are still highly regarded and collected all over the world.

Tiffany brought to you by Distinctive Lighting

Today, the name Tiffany is synonymous with products featuring stained and art glass pieces, copper foiled together, and particularly light fittings that benefit the beauty that the electric light bulb does to these when lit. Distinctive Lighting provides a range of looks that capture the Tiffany spirit; from highly traditional and transitional styles to more contemporary interpretations sure to suit any modern-day décor.

Whether you are looking for deep jewel tones and intricate patterns to serve as a statement piece in your home or whether you seek a light, neutral palette that offers the beauty of stained glass as a subtle complement to your room décor, we have many Tiffany style art glass lamps and lighting fittings that will suit your needs perfectly.

THE ART OF MAKING TIFFANY STYLE LAMPS

The skilled artisans trace out the pattern from a template then hand cut the art glass.

Each piece of glass is then ground to fit the shape of the mosaic pattern required.

Each piece of art glass is then cleaned and copper foiled.

Flux is then applied to the copper foil and each mosaic piece is put into place within the fibre glass mould.

The shade is then soldered together on the inside with lead solder, and again on the outside to strengthen construction.

An authentic Bronze patina is applied to the solder, it is then hand waxed to protect the solder from oxidation. It is then polished to give a lustrous finish.

Exquisite investments of today, cherished heirlooms of tomorrow

Art glass can be more expensive than crystal glass. All Tiffany collectibles are made of art glass and the shades in this collection have between 44 to 632 pieces. The average shade takes 80 hours to create by skilled artisans. Nothing adds colour to a room quite like Tiffany style lighting.

Taking care of Tiffany

Never use chemicals to clean your art glass. Use a damp cloth only to remove any excess oil. Use linseed oil on the solder to maintain the lustre after cleaning.

FLUSH & SEMI-FLUSH

A lot of modern properties are built with lower ceilings than those found in grander period properties. Despite this fact, there is no need to compromise on stylish and practical lighting as we offer a vast range of Flush and Semi-Flush fittings that can still add aspirational lighting designs into your home or hospitality project. See the full flush and semi-flush collection in our visual index section page 714-718.

PICTURE LIGHTS

The use of decorative picture lights to highlight family portraits or favourite artworks also doubles up as a subtle ambient light in the evening.

With several colour and size options available, our picture light collection has traditional, transitional and more modern styles to choose from.

TABLE & FLOOR LAMPS

This Portables collection brings together more than 200 options of table and floor lamps in a wide variety of designs, materials and styles. Features include reactive glaze ceramics, classic and contemporary formed metals, oriental porcelains and artistic design-led sculptures. Tiffany style portables can be found on pages 338-351.

NB1. Table Lamps are supplied complete with shades. The shade references are for ordering spares/replacements.

NB2. Please note many of these products in this lamp section feature reactive glazes, mouth blown glass and hand applied paint finishes. They can never be identical because of the nature of their hand-crafted work.

KITCHEN & PENDANTS

As more people desire open-plan kitchen/dining rooms we have seen the increasing popularity of using decorative pendants in this living space. It is ideal to hang single pendants in groups across a breakfast bar or island. We offer a great range of small compact mini pendants to grander three light island lights in all shapes, sizes and finishes. Most of the pendants come with adjustable rods, chain and cords so that you can customise the drop of the pendant to suit your ceiling height.

BATHROOM

This stylish range of products has been specifically designed for use in the bathroom environment, although they can also be used elsewhere within the home. Offering a choice of both classic and transitional designs, these fittings will add style and elegance to any bathroom setting. All of these products are IP44 rated, which is the water ingress rating required in many countries for bathroom lighting, making them suitable for Zones 2 and 3, (see page 738). G9 LED lamps are supplied with all fittings listed with G9 lamp holders.

Chrome or Nickel? Polished Chrome and Polished Nickel may seem very similar, but Chrome has a more blue tone while Nickel is warmer in colour. Polished Chrome doesn't tarnish or require frequent polishing. Polished Nickel will tarnish in a moist environment and require maintaining from time to time.

CHROME OR NICKEL?

Polished Chrome and Polished Nickel may seem very similar, but Chrome has a more blue tone while Nickel is warmer in colour. Polished Chrome doesn't tarnish or require frequent polishing. Polished Nickel will tarnish in a moist environment and require maintaining from time to time.

CEILING FANS

This new section features 24 ceiling fan models, suitable for indoors. Additionally, we offer 10 more fans suitable for use outdoors (as well as indoors). See our website for details.

A ceiling fan is a true multi-tasker. Stylish focal point, comfortable breeze maker, beautiful illuminator, even an energy saver when you adjust your heating and cooling system. Our collection of ceiling fans offers solutions for open-plan areas to cosy bedrooms and grand living or dining rooms.

60638

Page 690

Model Shown: 60623

TOP THINGS TO CONSIDER WHEN CHOOSING YOUR CEILING FAN.

IS THE FAN FOR INSIDE OR OUTSIDE?

There are some restrictions on where a ceiling fan can be placed, depending on how much moisture it will come into contact with. The icons below are used in this catalogue as a quick visual guide to help you know what fan you need.

Indoor (Dry)

All of our indoor fans should be kept to areas where they will not come into contact with water, for example, indoor living spaces and bedrooms.

IP20 (Humid)

Ceiling fans with an IP20 / (Humid) rating can be used in moderate humidity areas, for example, if you have a room that has bi-fold doors that integrates with the outdoors when opened. They cannot withstand direct contact with water.

IP23 (Damp)

Ceiling fans with an IP23 / (Damp) rating can be used in high-humidity areas, like enclosed porches, sunrooms or utility rooms. They feature water-resistant, durable finishes and incorporate galvanised undercoating on all metal surfaces to protect against rusting. Also, their blades are made of either ABS plastic or sealed wood to ensure longevity against damp conditions.

IP44 (Wet)

Ceiling fans with an IP44 (Wet) rating can be used in open areas with direct exposure to sun, rain or water spray, like pergolas and open porches. They have highly durable finishes against rain and snow and include all-weather ABS plastic blades.

(See our selection of outdoor fans in the Distinctive Lighting Exterior Catalogue).

WHAT STYLE DO YOU WANT?

We have a variety of different styles and finishes in our collection, designed to fit all needs.

Our modern ceiling fans add a clean, understated look to open spaces. You can choose something more traditional to complement rooms with classic, elegant décor. Or blur the lines with a transitional ceiling fan that is simple and sophisticated with minimal ornamentation.

HOW BIG SHOULD THE FAN BE?

When choosing a ceiling fan, it is important to first identify the area you intend to cool. Always focus a fan over the spaces people will spend most of their time. As in the example below, this may mean two smaller fans will be better than one large one. There are some measurements you should take to be sure that you choose the right size fan, see below for our guidance.

1

Measure the length and the width of the room or space and then multiply e.g. 12ft (3.7m) long by 10ft (3m) wide = 120 square feet. (11.1m²). Once you know the size of your space, you can narrow your search to select size fans. See the table below for guidance.

2

Measure the height of your ceiling. Fans should have a minimum of 7ft (2.1m) clearance between the bottom of the fan blades and the floor. Many of our ceiling fans work with 8ft (2.4m) or 9ft (2.7m) ceilings. If your ceiling is higher, you will need an additional down rod.

3

Bear in mind that all ceiling fans should have at least 12" (30cm) clearance from any wall or object. If you choose to use multiple fans, make sure there is a distance of at least 39" (99cm) between the blade tips of one fan and the next.

Room Size	Room Type	Blade Sweep	Fan Size
90 sq. ft. (8m ²) or less	Small bedroom or office, galley kitchen, outdoor applications	15" to 42" (38 - 107cm)	S
90 - 100 sq.ft (8 - 9m ²)	Over a kitchen table, large walk-in closet, laundry room, small screened-in porch, outdoor applications	44" to 48" (112 - 122cm)	M
100 - 200 sq. ft (9 - 19m ²)	Bedroom, larger kitchen, formal dining room, outdoor applications	50" to 54" (127 - 137cm)	M
200 - 300 sq. ft (19 - 27.87m ²)	Great room, Large outdoor patio, Master suite, outdoor applications	56" to 65" (142 - 165cm) or multiple fans	L
Over 300 sq. ft (27.87m ²)	Lobbies, Restaurants, Large open spaces	Over 65" (165cm +) or multiple fans	XL

ECO-FRIENDLY LIGHTING

You may wish to combine overhead lighting with your ceiling fan. Some of our fans have integrated lights with LED modules that use very little energy. Look out for the LED symbol on each product page to find these models. All our other fans that come with lights can take replaceable (retrofit) LED bulbs, so you can choose to make them more eco-friendly.

CUSTOMISATION

Some fans come with 2 sided blades so that you can customise the colour choice when you refresh your home décor.

All semi-flush models can be extended with additional downrods to bring the fan lower in rooms with high ceilings. See **p699** for downrods.

REDUCE ENERGY COSTS IN YOUR HOME

CIRCULATE AIR WITH THE SEASONS

When its hot outside, set the fan to rotate in an anti-clockwise direction. The blades will push air down – creating a breeze or cooling effect. A fan can make you feel 4°C cooler than the temperature of your surroundings.

In the winter, set the fan to rotate clockwise.

The blades will pull the air up and around, moving the warm air that rises to the ceiling back down to the living space. The effect can help you adjust your thermostat +2.2°C (4°F) during the Summer and -1.1°C (2°F) in the Winter. This makes a fan the only money-saving appliance in your home as it contributes to lower energy costs. (This is not applicable in the same way to outdoor fans.)

AC vs DC

AC MOTOR ADVANTAGES

- Less expensive than DC motors
- Great reliability
- Good energy efficiency
- 3-speed and 4-speed options are common

DC MOTOR ADVANTAGES

- More efficient than AC motors - using up to 70% less electricity
- Virtually silent operation
- Offers more power and torque while using less energy
- 6-speed options are common

CEILING FAN PERFORMANCE GUIDE

Throughout the catalogue, you will see detailed fan specifications with the table below included. This example is a quick guide to explain what each of the measures mean, and how to spot a fan with the right specifications for you.

AIRFLOW is measured in Cubic Feet per Minute (CFM). The higher the airflow number, the more the air the fan is circulating.

POWER USAGE for your fan motor is measured in watts. The lower the watts, the less energy the fan consumes. DC motor ceiling fans are the most energy-efficient, using the least amount of wattage.

AIRFLOW EFFICIENCY gives you the total picture: dividing the fan's CFMs by the watts of power it consumes. The higher the airflow efficiency number, the more air the fan is moving per watt.

AIR PERFORMANCE

AIRFLOW Cubic ft. per minute on high	7587
POWER USAGE Watts on High (excludes lights)	34
AIRFLOW EFFICIENCY Cubic ft. per minute per Watt	220

TIME TO CHOOSE YOUR FAN

This table provides a quick glance over the basic details of our residential fans. It will help you quickly decide which is the right fan for you.

SYMBOL GUIDE

This ceiling fan uses an AC (alternating current) motor.

This ceiling fan uses a DC (direct current) motor, meaning it uses less electricity.

DRY
This ceiling fan can be used in dry indoor locations only.

HUMID

This ceiling fan can withstand damp or humid conditions. It should be used in indoor spaces which might be affected by outdoor conditions.

This ceiling fan has an IP rating of 20, meaning it is protected against dust and humidity.

DAMP

This ceiling fan can withstand fair outdoor conditions and should be used in sheltered areas. It can still be used indoors.

This ceiling fan has an IP rating of 23, meaning it is protected against limited exposure to water spray.

WET

This ceiling fan can withstand wet outdoor conditions. It can still be used indoors. (See outdoor fans in our Exterior Catalogue).

This ceiling fan has an IP rating of 44, meaning it is protected against splashing water from any angle.

This ceiling fan comes fitted with an LED light source with low energy consumption.

This is the bladespan of the ceiling fan - its widest diameter. We provide the measurement in both centimetres and inches for ease of use.

DESCRIPTION

With a 65-inch blade span, this fan offers airflow to fit the occasion. The propeller inspired single-mold three-blade design creates a clean, sophisticated look. The dimmable LED light source provides 1,500 lumens of output. This is equivalent to about two 100-watt incandescent light bulbs, providing a substantial amount of room-filling ambient light.

INCLUDED FEATURES

Downrods 1 x 152mm

Mounting Options Standard, Angled

Light Type 1 x 16W LED, Integrated, Replaceable Module, Dimmable, 3000K, 80 CRI

Light Output 1500 lm

Light Glass White Polycarbonate

FAN FEATURES

Mounting Slope/Pitch 30°

Location Rating IP20 (Humid)

Hanging Weight 12kg

Body Material Steel

Warranty Limited Lifetime

DESCRIPTION

You'll love the vintage industrial feel that this ceiling fan brings to a space. Wood-tone blades create the look of rustic wood, while metal accents deliver a style that's equally at home in farmhouse or modern settings. Integrated, dimmable LED downlighting allows you to fill a space with just the right amount of light.

INCLUDED FEATURES

Downrods 1 x 152mm

Mounting Options Standard, Angled

Light Type 1 x 10W LED, Integrated, Replaceable Module, Dimmable, 3000K, 80 CRI

Light Output 1116 lm

Light Glass Etched Cased Opal

FAN FEATURES

Mounting Slope/Pitch 30°

Location Rating IP20 (Dry)

Hanging Weight 10.3kg

Body Material Steel

Warranty Limited Lifetime

BLADE SPECS

Blades (5) included	
Pitch	12°

ID: 60640

Finish: Brushed Nickel

DESCRIPTION

This petite ceiling fan has transitional appeal, partnering a traditional shape with a modern Brushed Nickel housing. The UV coated blades offer a Walnut or Cherry finish to suit a variety of small spaces in the home. This fan can be used in rooms with large openings to the outdoors, where humidity will likely affect this area.

INCLUDED FEATURES

Downrods 1 x 152mm
Mounting Options Standard, Angled, Flush

FAN FEATURES

Mounting Slope/Pitch 30°
Location Rating IP20 (Humid)
Hanging Weight 6.7kg
Body Material Steel

GENERAL 2 YEAR GUARANTEE – All fittings supplied from this catalogue, have a manufacturer's minimum guarantee of 2 years. This means that in normal and fair service, (and without incorrect or inappropriate installation or location), any product sold by Distinctive Lighting or its partners should have no fault develop within a minimum of 2 years from purchase. Any fault that is found is covered by guarantee to be repaired or replaced at the suppliers cost, within this period. ALL Lighting warranties/guarantees do not cover out of pocket expenses or consequential costs.

GENERAL NOTES

1. FINISHES. Many of the finishes used on these ranges are hand applied (patinated) and some small variations and irregularities in the finish are to be expected from fitting to fitting. This is part of the process of manufacture and, far from being a problem it is an important part of the nature of hand made and hand finished items. In particular, fittings with the Old Painted Bronze (OPB) finish will vary between ranges, which may appear quite significant, as they come from a number of different manufacturers.

2. LAMP-HOLDER TYPES. Most fittings are constructed with either E14 lamp-holders (small Edison screw, sometimes referred to as SES or with E27 lamp-holders (standard Edison screw, sometimes referred to as ES. Appropriate E14 and E27 lamps are widely available in a range of styles, wattages and light sources including incandescent and LED. Some of these lamp-holders are now supplied with threaded skirts, together with candle tubes and shade rings. This means that these products can be used either as a fitting with candle tubes and candle lamps, or with glass using the shade ring. Additionally we make certain fittings which use G9 and GX53 lamps. Lamps are usually supplied with these fittings.

3. WATTAGES. Most fittings shown in the catalogue are shown with Maximum Wattage recommendations. These recommendations are calculated mainly by heat capability, as there is a correlation between heat and wattage. However, in many countries traditional incandescent lamps, such as 100W GLS are no longer available. There are now many new versions of lamps in the market, lower wattage but similar light

performance such as halogen replacement, compact fluorescent and LED. Most fittings wattage capacity and certification has been based on the criteria using an Incandescent lamp and so when choosing lamps, please take care to ensure that wattages specified are of no more than the equivalent original incandescent lamps. In the case of LED, the wattages are far lower, but some of these can still run very hot, not dissimilar to incandescent of much higher power.

4. FLUSH CONVERT/DUAL MOUNT. A few of the chain models are constructed so that they can be easily modified from a chain fitting into a semi-flush fitting. Note that once converted to semi-flush it is not then possible to easily convert back to a chain fitting, as some re-wiring is likely to be required.

5. CUSTOMISATION. Some of our ranges supplied in matt black can be relatively easily patinated into finishes such as Black/Gold, Black/Copper etc. Equally, for chain suspended fittings that need extra chain and cable, these can also be relatively easily undertaken. Both such modifications may incur longer lead times and will have small additional costs added to the price. (See current Terms and Conditions.). Beyond this, with appropriate lead time and client budget, more specialised changes can be undertaken such as different colours completely, changes to dimensions and design modifications and even fully bespoke fittings can be considered due to our varied manufacturing resources available. Once production has begun a customised product cannot be cancelled or returned.

6. COMPLIANCE/ APPROVALS. All products within this catalogue conform with the European Union Low Voltage Directive, BS EN 60598-1:2008, the product standard for luminaires recognised across Europe and all fittings are CE marked. Every luminaire is individually tested to ensure that the product is electrically sound and meets the company's quality standards. A unique test / batch number is then applied to the fitting. Please contact us for further details or advise us of your local needs.

We are manufacturing members of the UK Lighting Industry Association and conform to all aspects of the Lighting Industry Association Code of Practice for luminaire production.

SAFETY & COMPLIANCE

Safety is paramount with all lighting, and especially when used outdoors. All of the products within this catalogue are manufactured to be safe and fit for their intended purposes.

All products are made to CE and UKCA Standards. They are fully inspected and tested for electrical safety and function. They are all constructed to **BS EN 60598-1:2015** standards and **all bathroom models are IP rated** to ensure suitable protection against the ingress of water.

The company is also **certified ISO9001 compliant** in both of our major European locations to further show commitment and competence in the manufacturing and supply of safe and reliable product.

Some of the products featured in this catalogue state an IP rating such as IP44. The term IP stands for Ingress Protection and relates to the product's ability to protect electrical parts from ingress of moisture and water. In particular, this is relevant for products being used in Bathroom locations.

For installation and compliance purposes, bathroom spaces have been divided up into zones 0 to 3 and this diagram shows how lighting in a Bathroom should be planned based on these zones.

1st Digit	Short Description (Protection against ingress of solid bodies)	2nd Digit	Short Description (Protection against ingress of moisture)
0	Non-Protected	0	Non-protected
1	Protected against solid objects greater than 50mm dia.	1	Protected against dripping water falling vertically greater than 50mm diameter
2	Protected against solid objects greater than 12mm dia.	2	Protected against dripping water when the Luminaire is tilted up to 15° from its normal position
3	Protected against solid objects greater than 2.5mm dia.	3	Protected against spraying water falling on the Luminaire at any angle up to 60° from the vertical
4	Protected against solid objects greater than 1mm dia.	4	Protected against splashing water from any angle
5	Dust-protected	5	Protected against water jets from any direction
6	Dust-tight	6	Protected against powerful water jets
		7	Protected against immersion in water under defined conditions
		8	Protected against continuous submersion under manufacturers specified conditions
Example IP65 Dust-tight and protected against water jets from any direction.
